# INTRODUCTION

This issue of Statistics of Communications Common Carriers contains financial and operating data for the year 1964. The information was taken principally from annual and monthly reports filed by the carriers with the Federal Communications Commission. This publication has been issued annually since 1939. Previous to 1957 it was titled "Statistics of the Communications Industry in the United States".

All communications carriers engaged in interstate or foreign communication service, except those so engaged solely through connection with the facilities of another unaffiliated carrier, are subject to all the common carrier provisions of the Communications Act of 1934, as amended. Telephone companies having annual operating revenues exceeding \$100,000 and telegraph carriers whose annual operating revenues exceed \$50,000 are required to file annual reports with the Commission. Telephone companies required to file annual reports are classified into class A, those having annual revenues exceeding \$250,000 and class B, those having annual revenues exceeding \$100,000 but not more than \$250,000. Companies controlling communications common carriers whose annual revenues exceed \$2,500,000 are also required to file annual reports. Annual reports for the year 1964 were filed by 77 telephone carriers, 9 telegraph carriers and 7 controlling companies. Telephone carriers whose annual operating revenues exceed \$1,000,000 and telegraph carriers having annual operating revenues exceeding \$250,000 are also required to file condensed monthly reports of financial and operating data.

Part I of this volume contains information concerning all reporting carriers.

Part II contains financial and operating data relating to telephone carriers. Summaries for all subject telephone carriers and for the Bell companies are included, as well as data by individual carriers. "Bell companies" as used in this publication represents the American Telephone and Telegraph Company, its principal telephone subsidiaries, and The Cincinnati and Suburban Bell Telephone Company and The Southern New England Telephone Company. It is estimated that, on the basis of assets and of revenues, the telephone carriers reporting to the Commission represent about 90 percent of the telephone industry in the United States. The gross book cost of communication plant of the reporting telephone companies was \$34,978,232,000 as of December 31, 1964, as compared with \$32,303,966,000 as of December 31, 1963, an increase of 8 percent. The total operating revenues reported by these carriers for the year 1964 were \$10,952,599,000 as compared with \$10,160,654,000 for the year 1963, an increase of 8 percent; and the total operating expenses, excluding taxes, amounted to \$6,505,650,000 as compared with \$5,957,519,000 for the preceding year, an increase of 9 percent. In compiling summary figures for telephone companies duplications between Bell companies with respect to securities, receivables, payables and items of income and expense, except in minor instances, have been eliminated.

Data relating to the larger non-subject telephone carriers, supplied voluntarily by those carriers, are shown in Table 18 of this issue.

## INTRODUCTION -- continued

Part III of this volume contains data relating to domestic and international telegraph carriers. The telegraph carriers reporting to the Commission, along with record communications business reported by telephone companies, represent practically all of the telegraph industry in the United States. The gross book cost of communication plant of the domestic telegraph carrier amounted to \$634,636,000 as of December 31, 1964 as compared with \$596,587,000 as of December 31, 1963, an increase of 6 percent. The gross book cost of communication plant of international telegraph carriers was \$191,412,000 as of December 31, 1964 as compared with \$153,465,000 as of December 31, 1963, an increase of 25 percent. The operating revenues of the domestic telegraph carrier for the year 1964 amounted to \$299,410,000 and the operating expenses, excluding taxes, amounted to \$267,030,000 as compared with \$286,822,000 and \$255,273,000, respectively, representing an increase of 4 percent in revenues and 5 percent in expenses as compared with the year 1963. The operating revenues of international telegraph carriers for the year 1964 amounted to \$107,560,000 and the operating expenses, excluding taxes, amounted to \$85,764,000 as compared with \$97,822,000 and \$79,868,000, respectively, representing increases of 10 percent in revenues and 7 percent in expenses over the year 1963.

Part IV of this volume contains balance sheets and cash statements of the Communications Satellite Corporation.

Part V of this volume shows the intercorporate relations of all the subject carriers and controlling companies reporting to the Commission.

( ) Indicates reverse item.

1/ Represents credits to income tax expense by companies who, for tax purposes but not for accounting, used liberalized depreciation methods recognized by Section 167 of the Internal Revenue Code of 1954 in prior years along with "normalization" tax accounting. They have now either ceased using liberalized depreciation or have switched to "flow through" tax accounting and are amortizing to income tax expense the previously accumulated provisions for future taxes.

2/ Western Union Telegraph Co. had an estimated net reduction in Federal income tax expense of \$5,500,000 arising from the utilization, for income tax purposes but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. There was also an estimated net increase in Federal income tax expense of \$123,000 arising from the use in prior years of five-year amortization authorized under Section 168 of the Internal Revenue Code of 1954. The accumulated net balance at December 31, 1964, of liberalized depreciation and five-year amortization income tax differentials accounted for on the "flow through" basis was \$27,866,000.

3/ These amounts represent credits to income tax expense by companies in the American Cable & Radio System, who, through 1960, for tax purposes but not for accounting purposes, used liberalized depreciation methods recognized by Section 167 of the Internal Revenue Code of 1954 along with "normalization" tax accounting. The provisions in the accounts for deferred taxes are being amortized in equal amounts over ten years commencing in 1962. The A. C. & R. companies had for the year 1964 a total net reduction in Federal income tax expense of \$300,000, arising from the utilization for tax purposes of liberalized depreciation which was accounted for on the "flow through" basis. The accumulated amount of liberalized depreciation income tax differentials accounted for on the "flow through" basis for the years 1961 to 1964, inclusive, was \$1,110,000. Similarly, RCA Communications, Inc. permitted \$750,000 to "flow through" with the accumulated amount for the years 1957 to 1964, inclusive, being \$3,287,000.

4/ Data not available.

5/ Western Union Telegraph Co. was unable to use its investment tax credit applicable to 1964 of approximately \$523,000 due to the absence of tax liability.

Note.—The 1962 County and City Data Book published by the U.S. Bureau of the Census shows the percent of occupied housing units having a telephone available to the occupants (whether located inside or outside the unit or serving the occupants of several units) as of April 1, 1960, by counties and cities. The 1956 issue of this publication shows the number of business and residence telephones, separately, as of January 1, 1955, by counties.

Source: Annual reports filed with the Federal Communications Commission. In a few instances data from unofficial sources or estimates were used.

Note.--Intercompany duplications between the Bell companies have been eliminated, except profits and losses on intercompany transfers of plant.

\* The difference in the number of carriers reporting to the Commission for each year is due to mergers, reclassifications, etc. In 1951, the revenue classifications for telephone carriers were revised upward, resulting in a smaller number of class A carriers.

<sup>1/</sup> In comparing data in this table, consideration may be given to the minor effect of the revision of the Uniform System of Accounts, effective January 1, 1937, resulting in certain changes in and rearrangements of both the balance sheet and income statements.

<sup>2/</sup> Includes local service revenues, toll service revenues, and miscellaneous revenues.

<sup>3/</sup> Includes company, service and private line telephones.

<sup>4/</sup> Figures are partly estimated. Local calls after 1950 include only completed calls. Toll calls include both completed and uncompleted calls for all years. The numbers of calls have not been adjusted to reflect the reclassification of calls over the years from "toll" to "local" due to the enlargement of local calling areas.

<sup>5/</sup> The numbers reported for the years 1935-1942, and for 1961-1964 are as of the end of December. The numbers reported for the years 1943-1960 are as of the end of October.

<sup>6/</sup> Represents total compensation for the year divided by the number of employees.

1/ Relatively minor amounts of revenues from U. S. sources from telephone operations of RCA Communications, Inc. in Guam (and Hawaii, prior to October 9, 1957) and of All America Cables and Radio, Inc. in the Virgin Islands are not included in this tabulation.

2/ Includes the carrier's share of the overseas service charges attributable to the landline haul in the U. S.

3/ Private line revenues include the following amounts (some partly estimated) received from international telegraph carriers for the rental of overseas communications channels used by the lessees for the services offered by them. The year 1960 was the first in which there were any significant amounts received from the international telegraph carriers. The reduction in the amount of rentals received during 1964 is the result of the acquisition by indefeasible right of user of channels in telephone cables and the acquisition of ownership interests in telephone cables by certain international telegraph carriers.

In addition, Hawaiian furnished RCA Communications, Inc., in the above years, and for some time prior, two telegraph channels in the telephone cable between Honolulu and San Francisco as part payment (in addition to \$12,000 per month) for the latter maintaining for Hawaiian standby radio-telephone facilities in Hawaii. The bulk of the overseas private line revenues, except those from the international telegraph carriers, are from agencies of the U. S. Government.

4/ The first transoceanic cable was placed in service September 25, 1956.

5/ The first Hawaiian cable, in which the Hawaiian Telephone Co. owns an interest was placed in operation October 9, 1957. Prior to that date the Hawaiian - U. S. service was via radio and the Hawaiian radio facilities were supplied by RCA Communications, Inc.

6/ The telephone cable between U. S. and Puerto Rico was placed in operation January 26, 1960.

Note: Data shown in this table are compiled from AT&T's response to Part 43.61 of the Commission's Rules and represents all overseas message telephone traffic which either originated in, terminated in, or transited the continental United States (excluding traffic between the 48 contiguous states and Alaska). According to the respondent, the numbers of calls and amounts of revenues shown herein were obtained for the most part from final settlement reports exchanged between AT&T and its overseas correspondents. These data vary somewhat from the message counts and revenues shown in Table 13. The data in such table are those recorded by AT&T in its books of account in accordance with FCC Uniform System of Accounts and reflect monthly credits which are partly estimated, due to insufficient information from overseas correspondents at the time of preparing monthly entries. Such estimates are adjusted in the month when final settlements are made, usually within three months. Thus the 1964 accounting entries contain adjustments for the last quarter of 1963 and unadjusted estimates for the last quarter of 1964. Table 13 contains substantial revenue reported by three carriers from calls handled jointly with AT&T, principally to or from Hawaii, Puerto Rico and Cuba. It also contains a relatively small number of calls, and revenues from these calls, which AT&T did not participate in handling.

( ) Deficit or other reverse item.

- 1/ The intercompany duplications between the Bell companies with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of unappropriated earned surplus, or in the case of the investment of American Telephone and Telegraph Company in Pacific Northwest Bell Telephone Company, against other capital surplus insofar as the latter is applicable to the intercompany holding.
- 2/ Includes the American Telephone and Telegraph Co., its principal telephone subsidiaries, and two associated companies, The Southern New England Telephone Co. and The Cincinnati and Suburban Bell Telephone Co.
- 3/ Does not include \$666,826,000 representing proportionate interest in the net assets of subsidiaries not consolidated in excess of book cost of the investments in such subsidiaries, which is added to book cost of investments and to surplus in consolidated balance sheets published by the Bell System.
- 4/ Reflects a reduction of \$9,086,427 on account of netting receivables from and payables to certain affiliated and other companies shown separately on the books of the two Departments.
- 5/ Attributable principally to investment credits on plant and equipment purchases of Bell Telephone Laboratories, Inc.
- 6/ Does not include \$71,438,628 proportionate interest in earnings (after dividends) of subsidiaries not consolidated, which is included in other income in consolidated income statements published by the Bell System.
- 7/ During the year 1964, Surplus was debited and Other Deferred Credits credited with \$35.3 million as a result of a re-evaluation of items eligible for investment credit for the years 1962 and 1963. An offsetting entry in the same amount was made debiting Taxes Accrued and crediting Surplus. In addition, a credit to Surplus with offsetting debit to Taxes Accrued was made to record the amortization of investment credit applicable to 1962 and 1963 in the amount of \$8.1 million. Other credits to Surplus include principally \$7.7 million profit on sale of Inter-Mountain Telephone Company stock, \$7.7 million transferred from Reserved Surplus after conclusion of a rate case in Kansas, and \$1.1 million extraordinary dividend income of Southwestern Bell. Other miscellaneous debits to Surplus include principally \$5.9 million capital stock expense of A.T.&T., \$2.9 million revenue refund related to conclusion of a rate case in Kansas, and \$1.5 million depreciation adjustment related to retirement of private mobile radio-telephone equipment. The 1962 and 1963 investment credit adjustments were made to reduce the tax liability account and increase the other deferred credit account in which the unamortized investment credit is carried in order to conform the companies' books in this respect with the tax returns as filed and to record the amortization of investment credit applicable to these two prior years.
- 8/ Includes credit items, "Telephone franchise requirements" and "Expenses charged construction."
- 9/ Includes only phantom circuit on transposed aerial wire; miles of phantom circuit on wire in cable not available.
- 10/ Data were not reported for Non-Bell companies.
- 11/ The number of lines reported for Pacific Telephone & Telegraph Co. includes those of Bell Telephone Co. of Nevada.
- 12/ Partly estimated.
- 13/ Transiting messages are reported only by the system which first handles the message.
- 14/ Includes monthly charges and installation and move charges.
- 15/ Complete data not available.
- 16/ Does not include data for group life insurance, extraordinary medical expense insurance and basic medical expense insurance financed jointly by the companies and the participating employees.

- 1/ West Coast Telephone Company filed one annual report for 1964 although its operations for that year were conducted by two separate corporations of which one succeeded the rights of the other as of the close of June 30, 1964. The successor corporation paid a \$1,800,000 special dividend on a nominal number of shares of common stock issued by it in the corporate restructuring. No attempt has been made to calculate a dividend rate per \$100 par or stated value of common stock in view of these extraordinary circumstances.
- 2/ Represents weighted average rate per \$100 par or stated value.
- 3/ These companies participate in wide area telephone service but have not determined and so classified the relatively minor amounts of revenue received therefrom, and have instead classified them as telephone message toll revenues (line 108 above).
- 4/ Data not reported. The West Kentucky composite depreciation rate was approximately 4.73%.
- 5/ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."
- 6/ Data were not reported for Non-Bell companies.
- 7/ Partly estimated.
- 8/ Represents completed calls only.
- 9/ Transiting messages are reported only by the system which first handles the message.
- 10/ To avoid duplication 954,453 messages between Puerto Rico and the United States have been excluded as these messages are included in the number of calls shown for American Telephone & Telegraph Co. The Puerto Rican company's portion of revenue for these messages amounted to \$4,706,555.
- 11/ Includes monthly charges and installation and move charges.
- 12/ Data not tabulated as reports for most Non-Bell companies are incomplete.

Note.--The data in this table are as reported by the carriers and include some estimates.

- 1/ The data shown under Domestic messages for the international carriers relate to domestic classification messages handled by such carriers between United States on the one hand and Canada and Mexico on the other.
- 2/ Represents that portion of transoceanic and marine messages which was transmitted between gateway points and points within the continental United States, Canada and Mexico and the domestic transmission revenues relating thereto. Accordingly, to avoid duplication the number of such messages has been excluded from the grand total.
- 3/ Excludes 259,563 marine messages handled during the year with related revenues of \$324,438. Such amounts are included under public, government, and press messages.
- 4/ Data relate to messages which did not originate in, terminate in, or transit the continental United States.

Note.—Data shown in this table are compiled from responses to the Commission's Rule 43.61 and represent all international message telegraph traffic which either originated in, terminated in, or transited the United States. The totals reported in this table differ from transoceanic traffic totals shown in Tables 22 and 31 for the reasons that (1) messages and words shown herein include international telegraph traffic handled by Western Union Telegraph Co. in the United States and exchanged with Canadian or Mexican carriers at the respective borders which was reported in Tables 22 and 31 as "Domestic transmission of transoceanic messages", (2) traffic of the French Cable Company is included herein, but excluded from Tables 22 and 31, and (3) traffic which did not originate in, terminate in, or transit the continental United States has been omitted herein, but included in Tables 22 and 31.

( ) Indicates revenue loss.

1/ Represents international-classification traffic which originated at overseas points and destined to Alaska, Canada or Mexico (outbound from United States), and similar traffic which originated in such places in North America and destined to overseas points (inbound to United States). This traffic was handled between such North American and overseas points by U.S. carriers with the contiguous United States.

Note:--Data shown in this table are compiled from responses to Commission Rule 43.61. The total revenues reported here differ from the amount of teleprinter exchange service (Telex) revenues reported in Table 31 for the following reasons: (1) Payments to domestic carriers for extension haul within the United States (48 contiguous states and the District of Columbia), when their facilities are used for this purpose (beyond the U.S. gateways for the most part), are included herein but excluded in the revenues in Table 31. Such payments are recorded as reductions of revenues in the books of accounts of the carriers. However, they are included in the traffic tables because they are not readily assignable to overseas circuits. Such payouts by the international carriers amounted to \$2,041,100 in 1964. (2) Certain international carriers furnish telex service at foreign points which do not touch the United States in transmission, the revenues for which are included in Table 31, but excluded herein. (3) The telex traffic and revenues of the French Cable Company are included in this table but excluded from Table 31.

1/ Index based on number of messages reported by the Bell companies only. Teletypewriter exchange service (TWX) was first offered by the Bell companies in 1931. Their 1964 revenues amounted to \$72,470,000. Western Union's domestic teletypewriter exchange service (Telex) began in 1958. Its 1964 revenues amounted to \$13,133,575.

2/ Western Union and Bell System private line telegraph revenues indexed above do not include revenues from relatively new but rapidly growing private line services such as TELPAK, data transmission, alternate telephone and teletypewriter, and alternate telephone and data. Bell System TELPAK, for example, which commenced in February, 1961, produced \$112.6 million in 1964 and Western Union's TELPAK which commenced in June, 1962, produced \$2.7 million in 1964.

( ) Deficit or reverse item.

- 1/ The Commercial Cable Co. sold its assets and operations in the United States and transferred its employees in the United States to its affiliate, ITT World Communications Inc., on October 31, 1964. The income statement amounts shown are for the ten months ended October 31, 1964.
- 2/ Globe Wireless Ltd. and Mackay Radio and Telegraph Co. merged as of August 31, 1964, and became ITT World Communications Inc. The income accounts of Globe Wireless Ltd. for the first eight months of the year have been included with those of ITT World Communications Inc. for the full year.
- 3/ There was an estimated net reduction in Federal income tax expense of \$5,500,000 arising from the utilization, for income tax purposes but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. There was also an estimated net increase in Federal income tax expense of \$123,000 arising from the use in prior years of five-year amortization authorized under Section 168 of the Internal Revenue Code of 1954. The accumulated net balance at December 31, 1964, of liberalized depreciation and five-year amortization income tax differentials accounted for on the "flow through" basis was \$27,866,000.
- 4/ The liberalized depreciation income tax differentials accumulated in the accounts of All America and Mackay (ITT World) during the years 1954 through 1960 are being amortized in equal amounts over ten years beginning January 1, 1962, to Provision for Federal Income Taxes. All America Cables & Radio, Inc., Commercial Cable Co. and ITT World Communications Inc. had for the year 1964 net reductions in Federal income tax expense of \$120,000, \$25,000 and \$155,000, respectively, arising from the utilization for income tax purposes but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. The amounts were accounted for on the "flow through" basis.
- 5/ Investment tax credits under the Revenue Act of 1962 of approximately \$523,000 were not utilized by Western Union Telegraph Co. due to the absence of tax liability for 1964. The unused investment tax credit carryover, available for tax reduction in subsequent years, is estimated at \$2,500,000.
- 6/ No amount of investment credits was realized during 1964.
- 7/ ITT World Communications Inc. realized during 1964 investment credits in the amount of \$206,392. They were given immediate total flow through treatment.
- 8/ To eliminate earned surplus of Commercial Cable Co. See footnote 1.
- 9/ Consisted of a dividend in kind equal to the book value of the mortgage investments previously carried as "Other investments" plus accrued interest thereon to November 30, 1964.
- 10/ Represents revenues from messages which did not originate in, terminate in, or transit the United States.
- 11/ Also had additional revenue from teleprinter exchange service amounting to \$663,692 which has been included in item 114.
- 12/ Includes \$663,692 revenue from international teleprinter exchange service.
- 13/ Includes territories and possessions of the United States except the Canal Zone.
- 14/ Includes domestic classification messages (primarily Canadian and Mexican) handled by the international carriers.
- 15/ Includes the domestic transmission of marine messages.
- 16/ Includes (1) telegraph traffic which originated in, terminated in, or transited the United States and its possessions, and (2) traffic handled between points located outside the United States and its possessions.
- 17/ To avoid duplication 1,401,908 messages and 33,760,300 words handled by All America Cables and Radio, Inc. have been excluded as these messages and words are included in the numbers reported by ITT World Communications, Inc. All America's portion of revenue for these messages was \$3,237,450.
- 18/ Excludes the domestic transmission of marine messages.
