Tower Construction Notification System (TCNS)

The Commission's TCNS works to increase communication with Indian Tribes and Native Hawaiian Organizations (NHOs) in the context of the review required by Section 106 of the National Historic Preservation Act (NHPA). It also provides Tribes/NHOs and State Historic Preservation Officers with early notification of proposed towers in order to facilitate compliance with the Commission's rules, and streamline the review process for construction of towers and other Commission undertakings.

Electronic Section-106 System (E-106)

The Commission's E-106 System may be used in completing the review process for proposed constructions of communications facilities under Section 106 of the National Historic Preservation Act (NHPA). E-106 is a voluntary system designed to save users time and resources by automating and expediting the exchange of information and correspondence in the Section 106 process.

How the Systems Work

Tower construction notification allows companies to voluntarily submit notifications of proposed tower constructions to the FCC. The Commission subsequently provides this information to federally-recognized Indian Tribes, Native Hawaiian Organizations (NHOs), and State Historic Preservation Officers (SHPOs), and allows them to respond directly to the companies if they have concerns about a proposed construction.

The E-106 System enables the real-time referral of information and documented communication among all participating parties, including the FCC. Using the E-106 System, parties proposing to construct communications facilities can now electronically submit the FCC Form 620 or 621 (September 2008 edition) to the SHPO/THPOs using a secure website maintained by the FCC. The new online forms 620 and 621 are substantively the same as the old forms but have been reformatted to accommodate the electronic system. This system also provides electronic notice of the filing to the relevant State Historic Preservation Officer (SHPO), federally recognized Indian Tribes, and other consulting parties, who will be able to access the filings pertinent to them using a secure password. SHPOs and consulting parties can also use the system to comment on filings and otherwise participate in the process, and to access each others' filings.

Subject: Weekly Notice of Tower Construction Notification System Filings For Positive Train Control Wayside Facilities - Email ID #

Dear Tribal Leader:

The Federal Communications Commission extends its greetings to you. Thank you for using our Tower Construction Notification System (TCNS). This letter is a notice of proposed positive train control (PTC) wayside pole construction notifications submitted by railroads within the last week, which match the geographic area(s) for which you have chosen to receive such notifications.

In the Program Comment to Govern Review of Positive Train Control Facilities Under Section 106 of the National Historic Preservation Act (PTC Program Comment), the Advisory Council on Historic Preservation adopted special procedures tailored to PTC wayside poles. The PTC Program Comment takes into account the time-sensitive public safety objectives of PTC as well as the need to protect historic properties, including Tribal traditional cultural properties. Therefore, we respectfully request that you respond within no more than 30 days with any recommendations or comments regarding the effect on historic properties of each of the proposed constructions listed below, including any need for additional information. Within this time period, the railroads that have submitted the notifications are encouraged to contact you to schedule meetings to discuss the adequacy of their submissions and potential avoidance, minimization, and mitigation strategies (including the need for monitoring). You may respond either through the TCNS as described at the end of this Notice, directly to the entity submitting the notification, or by contacting one of the FCC employees listed below. If you are unable to reach an agreement with the railroad on any disputed matter within 10 business days after the end of the 30-day period, you or the railroad may refer the matter to the FCC with a copy to the Advisory Council on Historic Preservation.

Please also be aware that, pursuant to the Best Practices guidance document between the FCC and United South and Eastern Tribes (USET) that was released in October 2004, the USET member Tribes have agreed to a recommended best practice to respond to "initial contact" notifications within 14 days. Created with the input of Tribal Nations and Tribal organizations from across Indian Country, and recognizing that cultural preservation processes vary greatly among the many Tribal Nations, the TCNS was designed to facilitate the initial contact process.

The following list indicates the geographic area(s) of interest which you have indicated to receive notifications of proposed communications facilities constructions, including PTC wayside facilities:

Subject: NOTICE OF ORGANIZATION(S) WHICH WERE SENT PROPOSED TOWER CONSTRUCTION NOTIFICATION INFORMATION REGARDING POSITIVE TRAIN CONTROL WAYSIDE FACILITIES - Email ID #

Dear Sir or Madam:

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS) for your proposed Positive Train Control (PTC) wayside poles in GARFIELD, Nebraska.

The purpose of this electronic mail message is to inform you that the following authorized persons were sent the information you provided through TCNS, which relates to your proposed wayside facilities. The information was forwarded by the FCC to authorized TCNS users by electronic mail and/or regular mail (letter).

Persons who have received the information that you provided include leaders or their designees of federally-recognized American Indian Tribes, including Alaska Native Villages (collectively "Tribal Nations"), and State Historic Preservation Officers (SHPOs). For your convenience in identifying the referenced Tribal Nations and in making further contacts, the City and State of the Seat of Government for each Tribal Nation, as well as the designated contact person, is included in the listing below. We note that Tribal Nations may have Section 106 cultural interests in ancestral homelands or other locations that are far removed from their current Seat of Government. Pursuant to the Commission's rules as set forth in the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission (NPA) and the procedures adopted in the Program Comment to Govern Review of Positive Train Control Facilities Under Section 106 of the National Historic Preservation Act (PTC Program Comment), all Tribal Nations listed below must be afforded a reasonable opportunity to respond to this notification, consistent with the procedures set forth below, unless the proposed construction falls within an exclusion designated by the Tribal Nation.

The information you provided was forwarded to the following Tribal Nations. Pursuant to the PTC Program Comment, these Tribal Nations are afforded 30 days from the date of notification to review your submission and make recommendations and comments, including requests for additional necessary information. During this period, you are encouraged to schedule meetings or phonecalls with the Tribal Nations referenced below to discuss the adequacy of your submission and potential avoidance, minimization, and mitigation strategies (including the need for monitoring). In the event a Tribal Nation does not respond to your notification and outreach efforts within the 30-day period, you may refer the

Subject: Reply to Proposed Tower Structure (Notification ID: 26072) - Email ID #

Dear Applicant,

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this email is to inform you that an authorized user of the TCNS has replied to a proposed tower construction notification that you had submitted through the TCNS.

The following message has been sent to you from Director of Cultural Affairs Name of the Ponca Tribe of Nebraska in reference to Notification ID #26072:

We have no interest in this site. However, if the Applicant discovers archaeological remains or resources during construction, the Applicant should immediately stop construction and notify the appropriate Federal Agency and the Tribe.

For your convenience, the information you submitted for this PTC notification is detailed below.

Subject: Confirmation - Referral of Positive Train Control Wayside Facilities - Email ID #2106395

Dear Applicant,

Your referral or notice to the FCC regarding proposed Positive Train Control wayside pole construction has been successfully submitted via the Tower Construction Notification System. You have provided this referral or notice for the reason(s) indicated below. If this is a referral because one or more Tribal Nations have not responded to your initial contact within 30 days, you need not involve those Tribal Nations further in the Section 106 review process for these poles unless otherwise directed by the FCC within 10 business days. If this is a notice because you have not resolved issues with one or more Tribal Nations within 30 days after your initial contact, you must continue discussions with the relevant Tribal Nation(s) for a minimum of 10 additional business days. If this is a referral because you have been unable to resolve issues with one or more Tribal Nations within 10 business days after the initial 30-day period, the FCC will advise you after considering this referral as to how to proceed. In this instance, you must also send a copy of your referral to the Advisory Council on Historic Preservation.

Below are the details you provided in the referral of the poles you have proposed to construct:

Subject: Confirmation - Referral of Positive Train Control Wayside Facilities - Email ID #2106395

Dear Applicant,

Your referral or notice to the FCC regarding proposed Positive Train Control wayside pole construction has been successfully submitted via the Tower Construction Notification System. You have provided this referral or notice for the reason(s) indicated below. If this is a referral because one or more Tribal Nations have not responded to your initial contact within 30 days, you need not involve those Tribal Nations further in the Section 106 review process for these poles unless otherwise directed by the FCC within 10 business days. If this is a notice because you have not resolved issues with one or more Tribal Nations within 30 days after your initial contact, you must continue discussions with the relevant Tribal Nation(s) for a minimum of 10 additional business days. If this is a referral because you have been unable to resolve issues with one or more Tribal Nations within 10 business days after the initial 30-day period, the FCC will advise you after considering this referral as to how to proceed. In this instance, you must also send a copy of your referral to the Advisory Council on Historic Preservation.

Below are the details you provided in the referral of the poles you have proposed to construct:

Positive Train Control Filing Subject to Expedited Treatment Under Program Comment

Notification Received: 04/03/2014

Notification Referred: 06/23/2014

Notification ID: 48633

Tower Owner Individual or Entity Name: City of DC

Consultant Name: Steve D Builder

P.O. Box: 1234

Street Address: 123 Fifth Street

Structure Type: B - Building

Latitude: 39 deg 25 min 25.5 sec N

Longitude: 79 deg 25 min 25.5 sec W

Location Description: Test

City: Baltimore

State: maryland

County: GARRETT

Detailed Description of Project: 10 Non-Excluded Wayside Poles

Ground Elevation: 10.0 meters

Support Structure: 10.0 meters above ground level

Overall Structure: 20.0 meters above ground level

Overall Height AMSL: 30.0 meters above mean sea level

Tribal Nations Subject to this Referral or Notice:

Skokomish Tribal Council

Reason for Referral/Notice: Tribe and railroad have not resolved issues within 10 business days after #2 (referral, you must also provide a copy of this referral to ACHP)
