Commission

TCNS & E106

-
- TCNS & E106 are secure databases housed on FCC servers
 - Use of TCNS ensures that the appropriate Tribal Nations are notified
 - All or almost all Federally-recognized Tribal Nations use TCNS
 - Permits approved FCC staff to access files and work with all parties to complete reviews in a timely fashion
 - No need to send paper files/no need to split filing to accommodate email size limits
 - Requires use of an FRN (easy to obtain)
 - Please take on-line training before using

-
- E106 “pulls” TCNS information into Form 620 and 621
 - E106 saves time and effort in completing the Form 620 and 621
 - E106 performs internal checks to insure properly completed forms
 - E106 will hold forms in draft for 30 days
 - E106 provides a record of process and decision archived by FCC
 - SHPOs tend to discard Form 620 and Form 621 after 3 years or so. They do keep reports
 - Facilitates collocation process for future activity

For help with TCNS and E106, SHPOs and Tribal Nations should contact Steve DeSordo, Anne Marie Wypijewski, or the cultural resource specialist to be named. If you contact the help desk or WTB's TSI Division also let Steve, Anne Marie, or "CRS" know as well
