Description of Uses of Collected 911/E911 Fees

The State of Maine has a statewide 911 system. In 2014 the system was upgraded to an end-to end NENA i3 aligned NG911 system. The Emergency Services Communication Bureau administers the program, which includes a contract for NG911 Services. This contract provides for a single NG911 system that serves every municipality and Indian Reservation in the state. It includes all network and database services, customer premise equipment at each of the 26 municipal, state or county Public Safety Answering Points (PSAPs), and 24 x 7 support and maintenance. There is no funding that flows through to the PSAPs or to municipalities, counties or state agencies for other purposes.

For calendar year 2017, funds were expended for the following activities:

- Administrative expenses of the Emergency Services Communication Bureau
- Statewide Contract for NG911 Services
- Quality Assurance Program
- Community Addressing and Mapping Support
- Training for E911 Call Takers and Dispatchers including topics such as NG911 software certification and Basic Dispatcher
- Emergency Medical Dispatch training, software, and administrative costs
- Emergency Fire Dispatch training, software and administrative costs
- Reimbursement of telephone companies for ALI/LIS data base provisioning

I. Measuring Effective Utilization of 911/E911 Fees

- 1. Please provide an assessment of the effects achieved from the expenditure of state 911/E911 or NG911 funds, including any criteria your state or jurisdiction uses to measure the effectiveness of the use of 911/E911 fees and charges. If your state conducts annual or other periodic assessments, please provide an electronic copy (*e.g.*, Word, PDF) of the latest such report upon submission of this questionnaire to the FCC or provide links to online versions of such reports in the space below.**

All state 911 funds are used to support a statewide 911 system and are not distributed locally. In 2014, the State of Maine completed a statewide, end-to-end NG911 deployment, positioning it well for new technologies as they are developed and tested. The ongoing yearly cost of this system is lower than the legacy E911 system it replaced.
