#### About the FCC Registration Number (FRN)

An FRN is a 10-digit number that is assigned to a business or individual registering with the FCC. This unique FRN is used to identify the registrant's business dealings with the FCC. The FCC will use the FRN to determine if all of a registrant's fees have been paid. You are encouraged to register with the Commission as soon as you expect to do business with the FCC. This way, you will be ready to access any of the electronic licensing systems without having to go through the registration process at the time you submit an application.

For more information, see [Public Notice DA 01-2452](#).

Answer the Rule Waivers question on the Application Information screen. If an applicant is requesting a waiver, it must upload an appropriate attachment justifying the waiver request.

Because each applicant must upload an exhibit demonstrating its eligibility for the 2.5 GHz Rural Tribal Priority Window and its compliance with the “local presence” requirement the answer to the Attachments question has been prefilled to “Yes” and cannot be changed.

The screenshot shows the FCC License Manager interface. The left sidebar contains the following sections: Application Information, Rule Waivers, and Attachments. The main content area displays the 'Rule Waivers' section with the question 'Does this application request a Waiver of the Commission's Rules?' and a dropdown menu set to 'No'. Below it is the 'Attachments' section with the question 'Are attachments being filed with this application?' and a dropdown menu set to 'Yes'. A callout box on the right side of the screen highlights these two sections and contains red text explaining the requirement for a waiver exhibit and the 'local presence' requirement. The callout also includes a red instruction to click the 'Attachments' link at the top of the screen to upload documents.

**Rule Waivers**
