

Ciena Open RAN Solutions

FCC Open RAN Solutions Showcase

Joe Marsella

Vice President PLM - Routing & Switching

July 14th, 2021

Ciena Wireless Networking

Leadership & Experience

Mobile Transport Deployment Experience

- Over 15 Years of Mobile Investment & Experience
 - **Connecting over 50% of US mobile towers**
- Solutions covering CSR, CSG, FHG, Wholesale & Edge Cloud

Industry Forums & Standards

- Industry participation - alliances & standards bodies
- O-RAN Working groups 1/4/5/6/10, ITU SG15, IWPC, IETF
- Participated in global O-RAN plugfest (hosted by Telefonica)

5G Innovation & Industry Proof Points

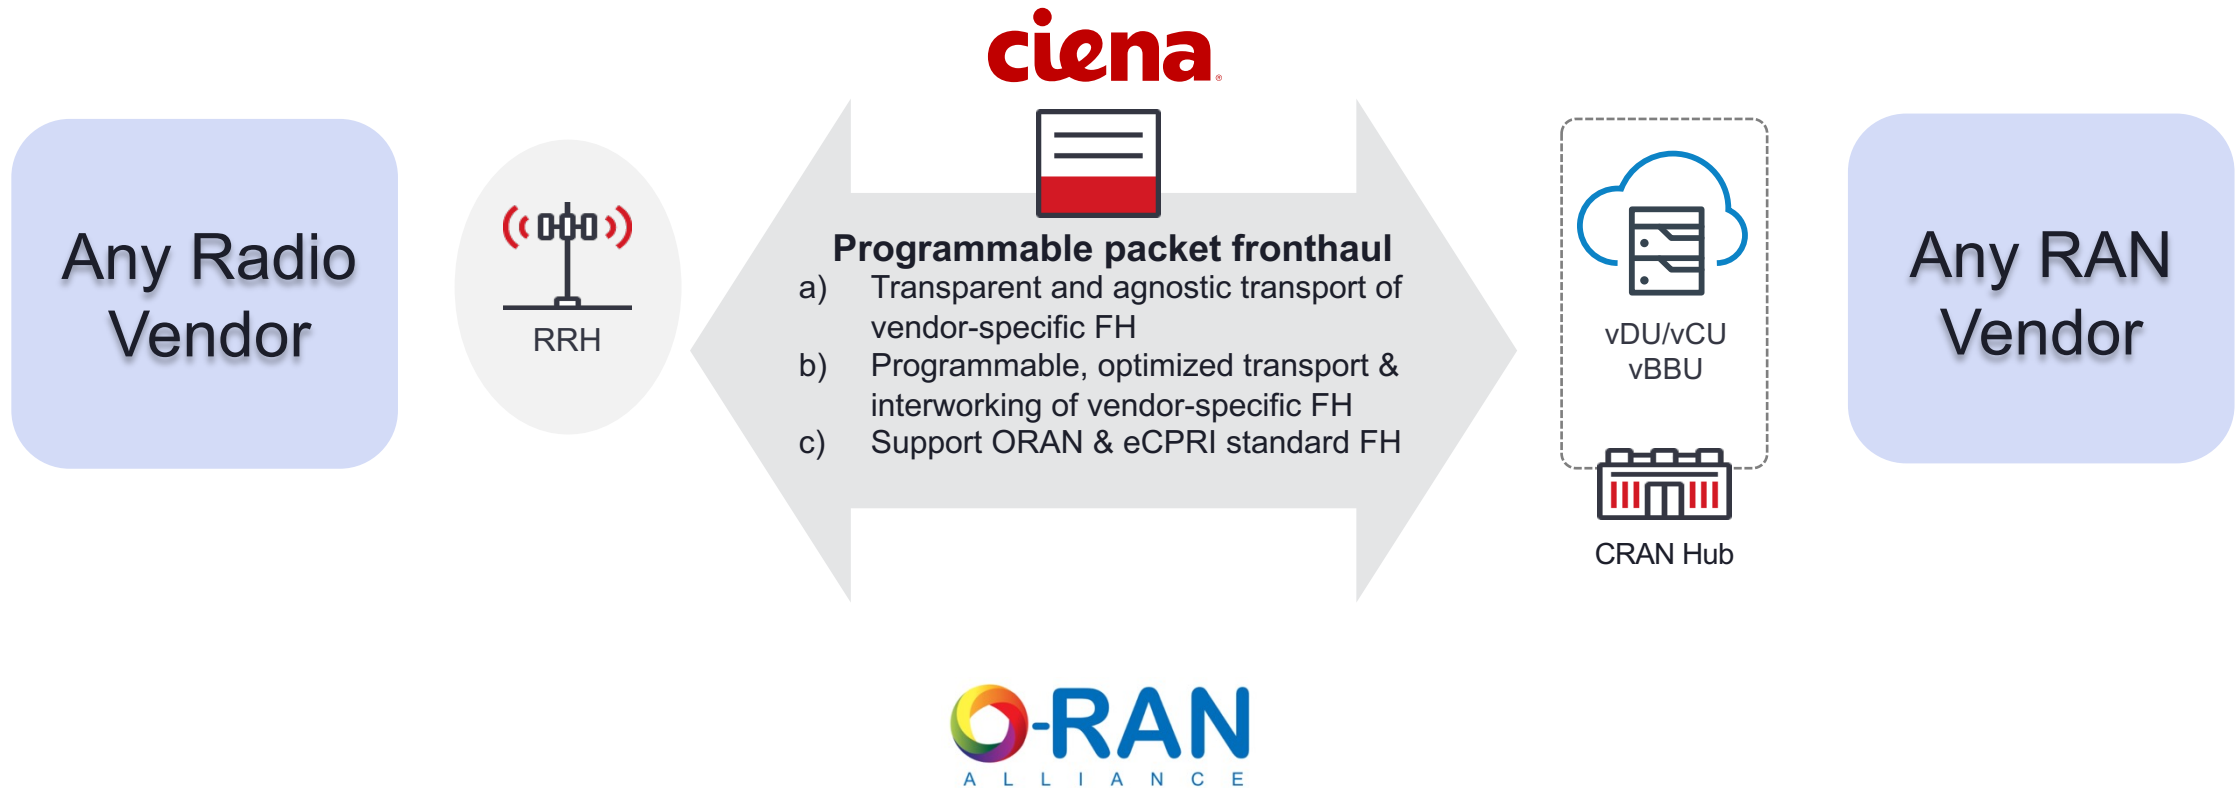

- ENCQOR Gov't Funded 5G Research & Innovation Network (Canada)
- 5G PoCs for xHaul network slicing & v5GC with Radisys
- Ciena Sponsored Multi-Vendor 5G Innovation LAB

Mobile Network Operators Desire for Open RAN Systems

Driving Innovation & Cost Efficiencies

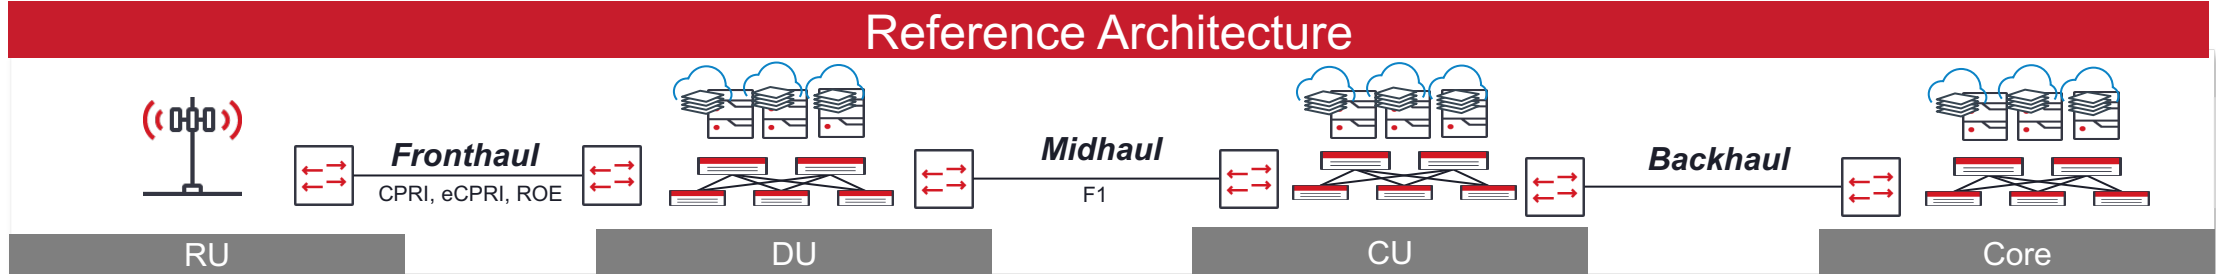

Transition from Proprietary to Open
(CPRI to O-RAN or eCPRI*)

O-RAN Alliance defining open interfaces between disaggregated RAN elements to enable broad community of suppliers and drive innovation

* eCPRI 2.0 defines CPRI to eCPRI interworking function (IWF) – but not fully open

O-RAN Solution Summary

Fully packetized for best economics

Both hard & soft Network Slicing

Complete Timing/Sync for precision

Lowest latency/jitter with FlexE

Mix 3/4G with 5G on same fiber

Proven multi-vendor interop

Mobility optimized routing

Adv. FH options to optimize Bandwidth

A comprehensive multi-generational solution for both D-RAN & C-RAN architectures, all available today.

FH=Fronthaul
RU=Radio Unit
DU=Distributed Unit
CU=Centralized Unit
MCP = Manage/Control/Plan

5G xHaul Router Family

Platform		Use Cases				
		5G Fronthaul (eCPRI/O-RAN)	4G/5G Fronthaul (CPRI/RoE/L1offload)	Mid/Backhaul w/ Adaptive IP	Wireline Services	Key Value
5168	 800G (14) 25G/10G/1G SFP28 (18) CPRI/25G/10G/1G SFP28 (4) 100/200G QSFP56	✓	✓	✓	✓	Broadest use case support
5164	 800G (32) 25G/10G/1G SFP28 (4) 100G/200G QSFP56	✓		✓	✓	Price Performance Leaders
5130	 360G (12) 25G/10G/1G SFP28 (2) 100G QSFP56					
5166	 800G (32) 25G/10G/1G SFP28 (2) 100/200/400G QSFPDD	✓		✓	✓	400GbE Coherent

Capabilities – 5130, 5164, 5166 & 5168

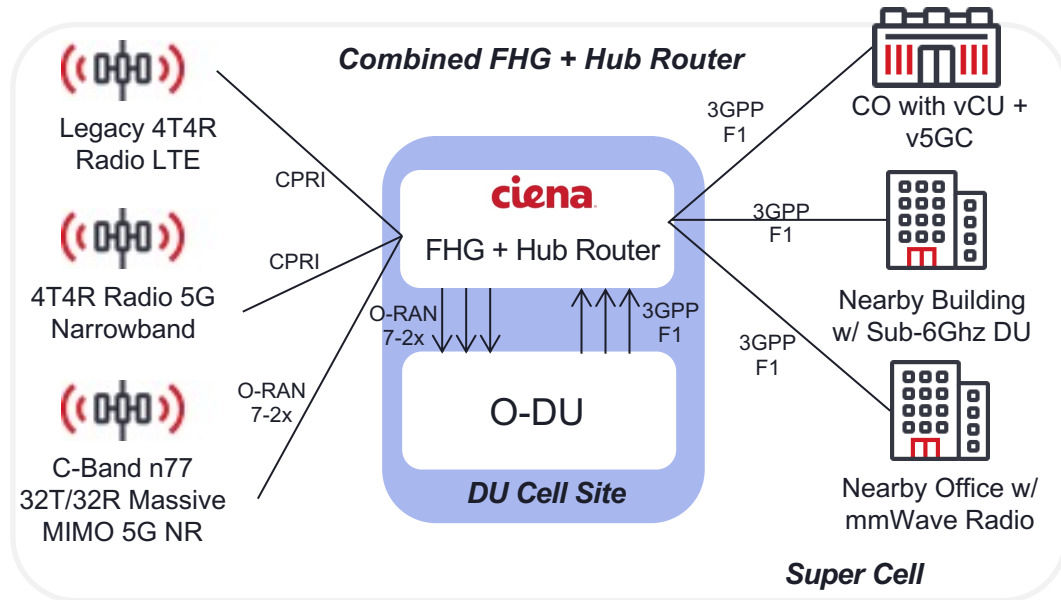

- ❖ L3/IP VPN
- ❖ L2 VPN/EVPN
- ❖ IPv4/IPv6
- ❖ SR-MPLS SRv6
- ❖ eCPRI / O-RAN
- ❖ Dense 10/25GbE
- ❖ FlexE / SPN
- ❖ 802.1Q / TSN
- ❖ GNSS/T-GM
- ❖ SyncE/1588v2
- ❖ H-QoS

Additional Capabilities - 5168

- ❖ CPRI 3-8
- ❖ RoE (IEEE1914.3)
- ❖ L1 Offload / O-RAN 7.2x
- ❖ CPRI-eCPRI IWF
- ❖ Programmable RAN Interop

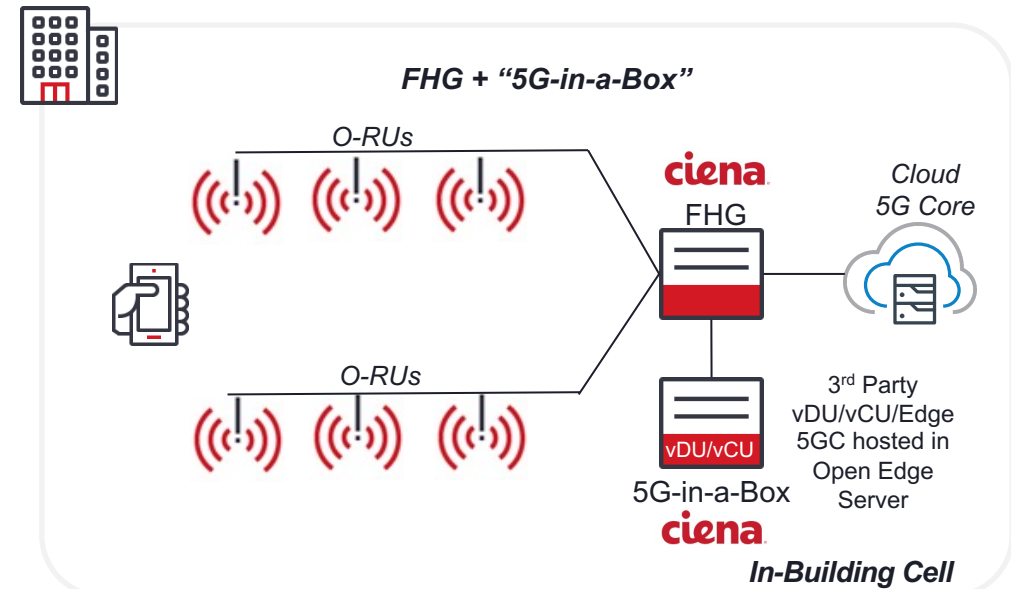

Common Deployment Models

Macro Site Model

Localized O-DU w/ Remote O-CU/5G Core

In-Building Site Model

Leveraging O-RAN Compression & Shared Cell

Solutions built to interoperate across a wide range of applications and deployment models

Joint Intel/Ciena MWC 2021 Virtual Event Demo

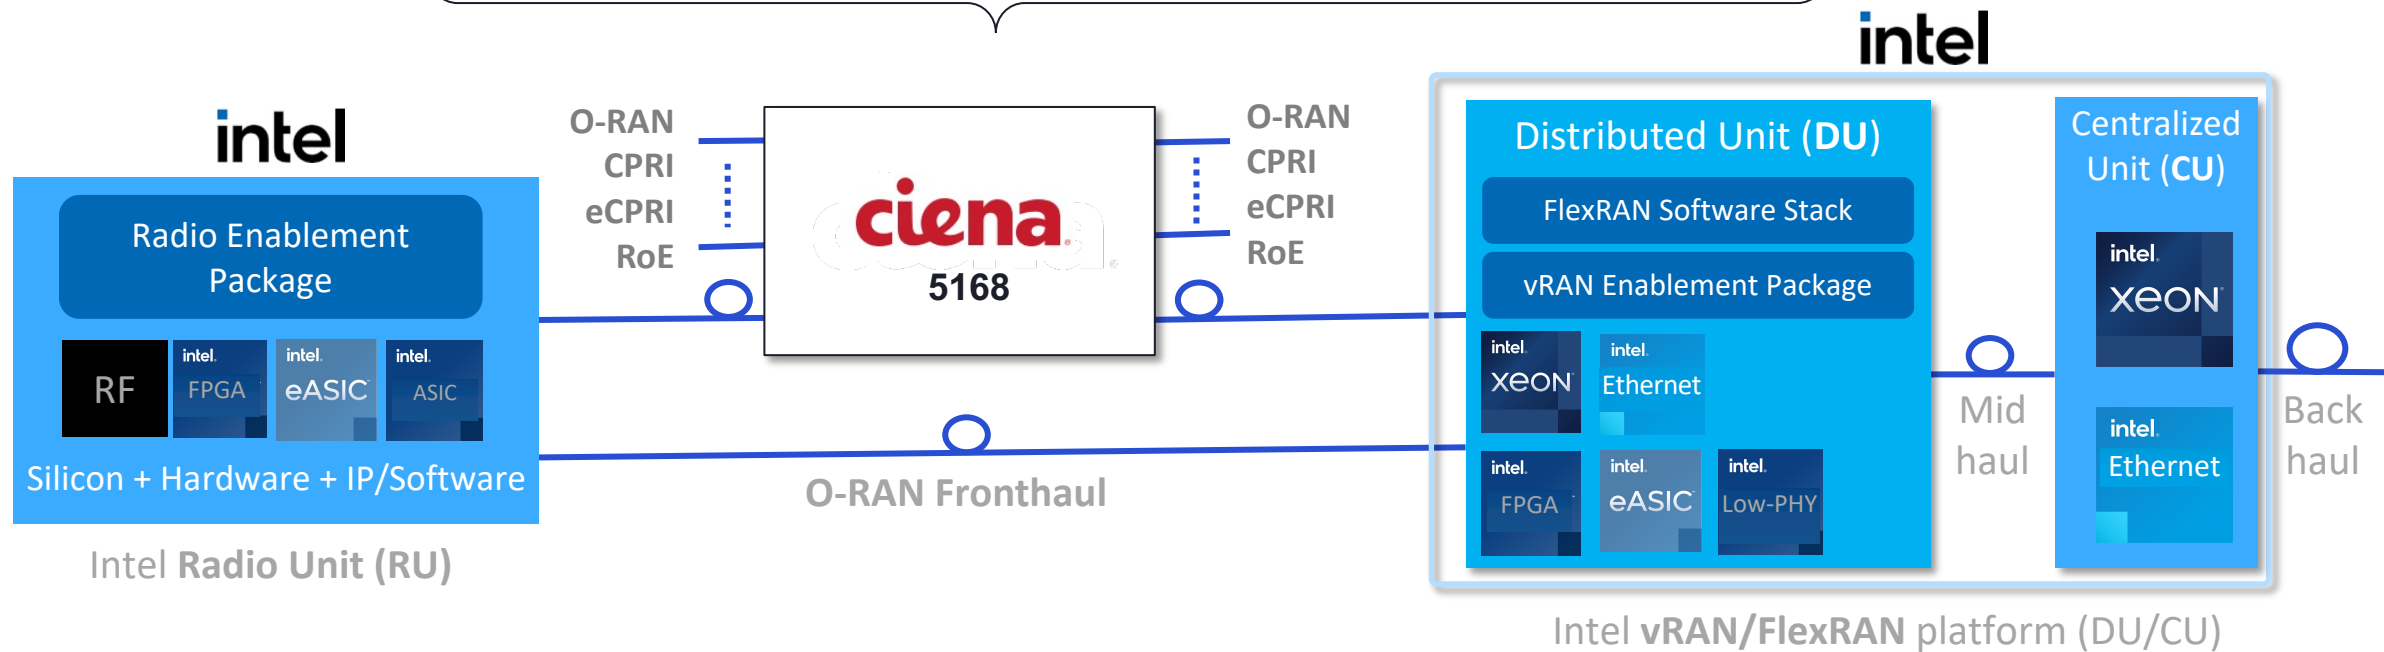

Showcasing the Ciena 5168 xHaul Router Fronthaul solution

Gateway supporting both O-RAN for New Radios & CPRI for legacy radios

ciena

Ciena 5168 xHaul Router w/ Fronthaul Gateway (FHGW)

Compliant to O-RAN WG7 Hardware Reference Design Specification for Fronthaul Gateway 1.0

Summary of How Ciena is Enabling Open RAN

Experience	Active in industry forums and deployed across mobile ecosystem with MNOs, wholesalers, cloud providers
Open & Programmable	Compliant to O-RAN specifications for transport and standardized interfaces for orchestration
Flexible	Best-of-breed transport for evolving mobile architectures (CRAN/DRAN) with any RAN or mobile core vendor
Proven	Live deployments and industry proof-points including multi-vendor O-RAN plugfests and MWC demonstrations

Delivering next-generation solutions that are enabling Open RAN deployments today

Thank You

IP Delivered Differently

Automated, open, lean. Because you asked.

Ciena's Adaptive IP™
