Fujitsu Network Communications

Network Expertise for Digital Transformation

We Help Network Owners Break through Their Status Quo to Achieve Higher Performance

40 Years in North America's Critical Network Infrastructure

Fujitsu Wireless History

Over 500K RRHs & 50K BBUs Shipped since 2014!

1995

Began supplying RAN infrastructure

2004

First world shipment of Fujitsu RRH

2014

Fujitsu begins supplying dual and triple band RUs

2019

World's first commercial O-RAN compliant 5G deployment

2020

O-RAN Trials in Europe

2021

First O-RAN compliant radios delivered to N. America

25 years of wireless expertise • O-RAN commitment and leadership

Fujitsu's 5G Ecosystem Overview

Open 5G Infrastructure

Integrated 5G Infrastructure

Private 5G

Solution ecosystem, based on open technology, for public and private 5G use cases

AVERAGE

Wide-band

(40+40)MHz → One box

Multi-band

Band1, Band18, Band28 → Triple Band

Multi-sector

Sec1, Sec2, Sec3 → Triple-Sector

Dual-band and Tri-band 5G O-RAN RU

	Dual-Band Macro RU	Tri-Band Macro RU
Frequency Bands	n70 + n60	n71 + n29 + n26
Configuration	4 TRx	4 TRx
Output Power	80W x4	30 +40 +10 = 80W x4
IBW	n70: 25 MHz n66: 90 MHz	n71: 35 MHz n29 11 MHz n26: 7 MHz
Dimensions	400x380x200 mm	400x380x230 mm
Weight	29 Kg	34 Kg
Cooling	Passive	Passive

Generally Available 5G O-RAN Radios

Deployed Internationally

Radio	Antenna Configuration	Antenna Gain	IBW
n77 Small Cell RU	4TRx	49 dBm EIRP	100 MHz
n77 Macro RU	4 TRx		100 MHz
n77 Macro AIR	8 TRx	69 dBm EIRP	100 MHz
n79 Small Cell RU	4TRx	51 dBm EIRP	100 MHz
N79 Macro RU	4 TRX		100 MHz
n79 Macro AIR	8 TRx	71 dBm EIRP	100 MHz
n257 Small Cell RU	2 TRx	42 dBm EIRP	40 MHz

5G Transport

- Fronthaul Solutions

flexiHaul xHaul Portfolio Summary

flexihaul 8000 Series

- First Gen Fronthaul technology
- C/DWDM circuit-based solution
- Backhaul / Shorthaul / Fronthaul
- Globally deployed
- Supports Pt to Pt and ring based topologies

HSN8500
- Large Scale
Chassis

HSN8300
- Mid Scale
Chassis

HSN8100
- Small Scale
Chassis

M6424 Ethernet FH

- 800G non-blocking / compact / hardened platform
- ROE CPRI (2,3,5,7,8,10) & eCPRI
- IPv4v6, EVPN, SR-MPLS
- IEEE 1914.3 ROE, 802.1CM TSN
- NETCONF/YANG, gRPC & SNMP

Smart Tunable SFP+

- Integrated with ORAN Radios + M6424
- 10G/25G options
- Fully integrated solution
- Self tuning with full management visibility

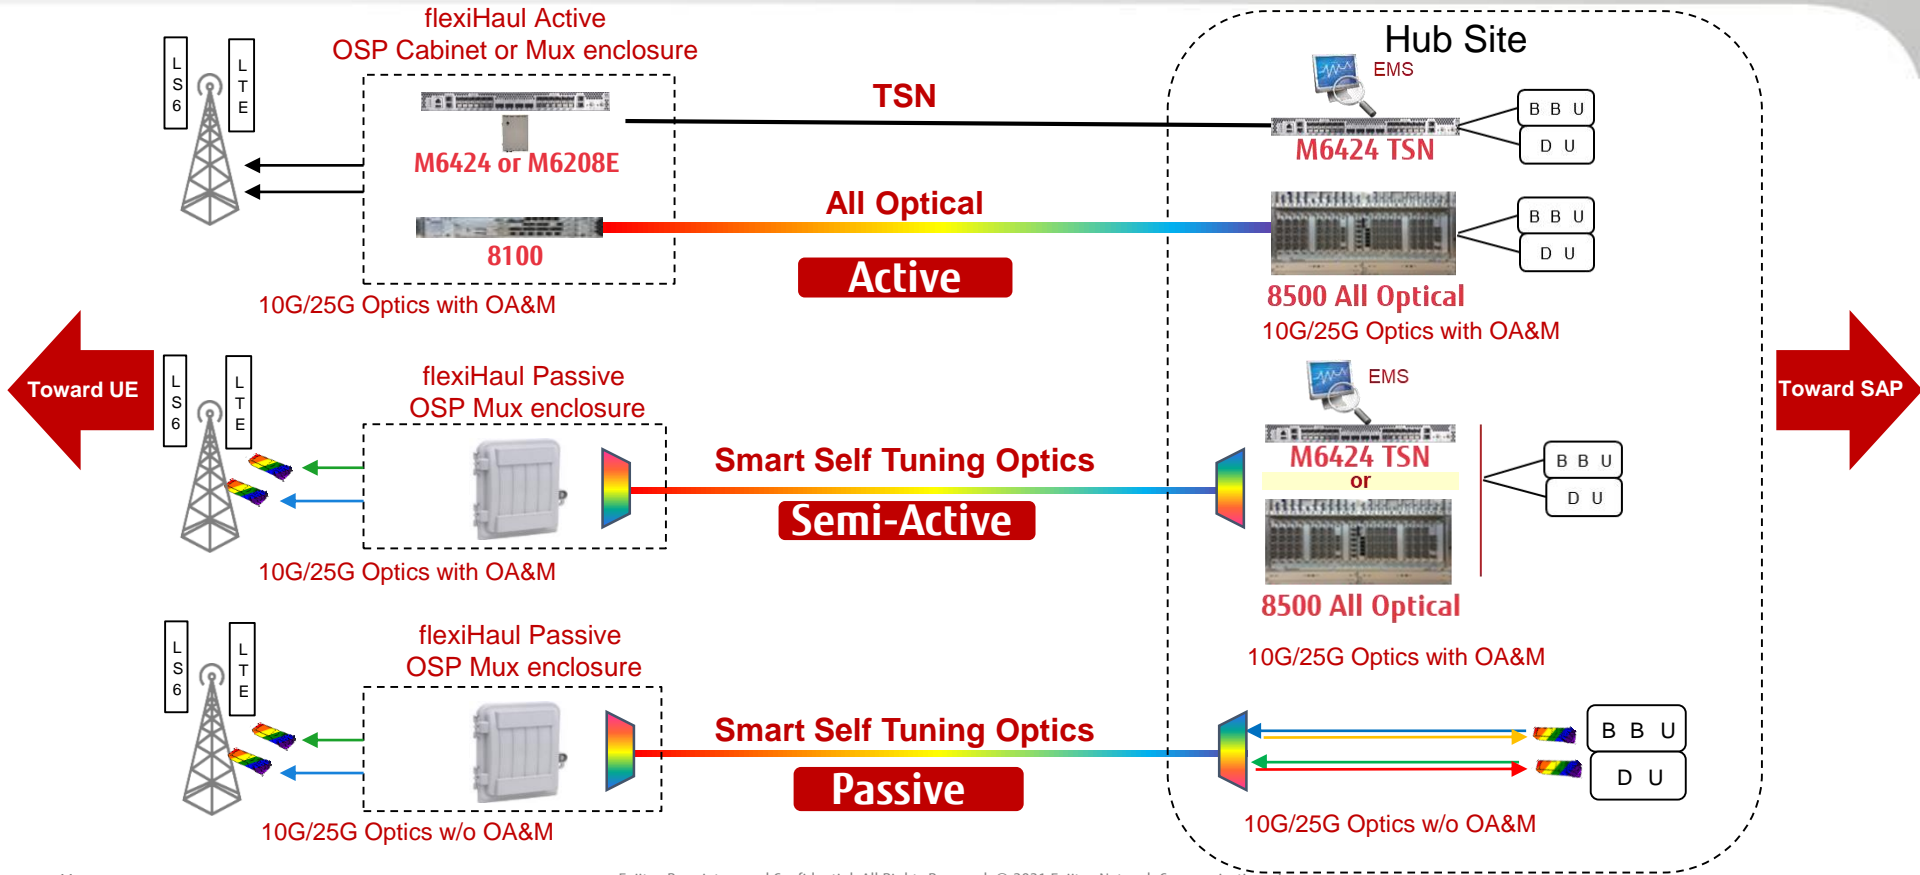

OSP Semi-Active

- Small footprint / passive
- Site flexibility / low costs
- Optimizes fibre assets (single fibre)
- Design options, inc. daisy chaining
- 10G/25G with service isolation
- Expandable to additional channels

Full optical and TSN portfolio meets any deployment

Operate and
Maintain Services

Fujitsu Network Communications, Inc.

- Richardson, TX
- Development.
 - Services
 - Manufacturing

Mission

- Interoperability of O-RAN profiles and vRAN operations
- Encourage operators to break out of vendor lock-in and develop the market

Goals

- O-RAN verification, certification and interoperability to blueprint configuration
- 5G maintenance support lab w/ mirror configurations of supported customers
- Customer demonstrations

Secure and independent
test facility

Automate
testing

Lab facilities
for multi vendors

Conclusion

Why Fujitsu?

"Fujitsu is a global leader in 5G radios, advocating for and advancing alternatives to the traditional hardware-based RAN. Their products and expertise are extremely valuable as we use O-RAN architecture to build our entire 5G network."

- Marc Rouanne, DISH Executive Vice President and Chief Network Officer

"The deployment of O-RAN-compliant products will enable DOCOMO to flexibly build networks and provide 5G services that meet customer needs. Carrier aggregation furthering 5G high-speed data communication in a multi-vendor RAN developed jointly with Fujitsu and NEC is an important achievement. DOCOMO will continue to work with industry partners to promote open RAN and 5G services."

- Naoki Tani, Senior Vice President

Commitment to Open

"With Japanese quality and a highly competitive cost structure as major differentiators, our joint efforts with Fujitsu are on track to bring significant incremental value to our customers and partners around the world."

-Tareq Amin, Representative Director, Executive Vice President and CTO

"KDDI aims to provide flexible end-to-end network slicing services with 5G network. We expect that Fujitsu's Radio Unit that is O-RAN (Open Interfaces) compliant will contribute significantly to the realization of this plan."

- Toshikazu Yokai, Executive Officer
