100% Software Platform

Low-touch software migration approach eliminates Rip and Replace

Single solution for Public and Private networks (w/ license + unlicensed bands)

Enterprise and MNOs share same network. MNOs can leverage enterprise Investment

Single or Multi tenant (Operator)

Wide bandwidth systems. e.g. U.S. CBRS as much of 150MHz as available. Mix of operator bands and private bands enabling multiple use cases on common infrastructure.

High capacity and easy SW sector/capacity programmability

Easy and faster deployment thanks to COTS and Untrusted Backhaul

Hours vs Days

1+ Gbps / sector
1,000's UEs / channel
