Explanation of Effort and Availability of Commercial Equipment

*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

An additional ten (10) towers have been completed and are undergoing reloads of current customers. Five (5) additional towers have been started but have further work on the site or additional site acquisition requirements to fulfill prior to replacing the equipment. One tower of the five will require significant modifications prior to replacement. Plans are to complete prior to winter but depends on availability of contractors.

As of this update, Country Wireless has not experienced any lack of availability of replacement equipment in the marketplace that threatens its build deadline, however, several of the sites under construction have required new electrical equipment that has been difficult to source quickly, causing a few delays in our build schedule.

Additional towers beyond the fifteen (15) described above will not be able to be completed without additional funding from the FCC.

*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

As of this update, Country Wireless has not experienced any lack of availability of replacement equipment in the marketplace that threatens its build deadline.

* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

An extension for the application has been filed and approved, extending the SCRP deadline to February 2025.
