## Explanation of Effort and Availability of Commercial Equipment

\*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

GigSky has made considerable efforts to move forward with the FCC Supply Chain Reimbursement Program, despite the challenges posed by limited funding. We have successfully removed and disposed of all untrusted equipment from our network, demonstrating our proactive approach to compliance and network security. However, with the current funding cap reached, our ability to compensate vendors for essential work has been significantly constrained.

While we have continued to engage vendors and strategize on how to proceed, the lack of full funding makes it difficult to continue operations without risking further financial instability. This funding shortfall not only limits our capacity to execute necessary upgrades but also puts the continuity and reliability of our services at risk. Despite these obstacles, GigSky remains committed to advancing the program and ensuring we are prepared for future opportunities, though full program funding is essential to maintaining momentum and meeting overall goals.

\*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

Replacement equipment was sourced and installed per the program requirements. No additional equipment orders have been placed at this time.

\* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.
