## Explanation of Effort and Availability of Commercial Equipment

\*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

My company has continued to conduct work on the removal of covered equipment. To date, we have replaced equipment for approximately 90% of our residential and commercial customers. The remainder of the residential homes are unoccupied and access has proven to be a challenge.

The 1st destruction of equipment is complete.

Ciena is still connecting the equipment through the network. Backbone customer traffic is now expected to start moving in July.

\*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

All equipment is in stock.

\* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

Despite having all equipment in stock, we have continuously had out of box failures on Ciena equipment. This keeps pushing us getting our new DWDM network in place so support migrating existing traffic as we are waiting on replacement product.
