United has completed the removal and disposal of the covered Huawei equipment and is nearing completion of the replacement equipment. We are still working on a few outstanding items, including some generators that are still in the process of being replaced. We hope that we can have them replaced by the end of the year. Through no fault of our own, United Wireless received an IMS Core that was end-of-lifed that would not be receiving updates, patches or critical care. In order to stay compliant with ever-changing regulations and legal requirements, along with necessary customer experience goals, we have been forced to consider an alternative IMS platform. This process is ongoing. United is waiting on the vendor to get more information, and cannot consider the project finished while they are uncertain if they will need to have a new replacement Core as part of the SCRP.
