RE: Radio Frequency Interference  
EB-FIELDNER-13-00009375

Dear Mr. Nelson:

The Federal Communications Commission previously notified you by letter dated June 24, 2013 that it had received complaints of harmful radio interference possibly caused by equipment being operated in your home. This interference had been reported by an operator in the Amateur Radio Service. The complainant is:

(Name withheld)  
(Address withheld)  
Grand Junction CO 81503

In this letter, you were advised that this problem, if unresolved, could be a violation of FCC rules and could result in a monetary forfeiture. For this reason, we encouraged the parties involved to voluntarily resolve this matter without Commission intervention. If however it became necessary to facilitate a resolution, the Commission might investigate possible rules violations and address appropriate remedies, including monetary forfeiture.

You were further advised to inform the complainant within 30 days of what steps would be taken to correct the reported interference problem. The complainant reports that he has not received any word from you as to what action(s) you were/are taking to resolve the interference.

**In order to avoid possible enforcement action, please advise this office within 20 days of receiving this letter of what action you have made, or intend to make, in order to identify and correct the source(s) of these radio emissions.**

If you have any questions about this matter, please contact me in writing at 1270 Fairfield Road, Gettysburg, Pennsylvania 17325 or via telephone at 717-338-2577.

Sincerely,

Laura L. Smith, Esq.  
Special Counsel
